Thanks to the folks from the Etsy company we have teamed up with, I'm getting a good place set up for my new art jewelry. It's moving fairly slowly, but I'm finishing up my design ideas and hoping to have something finished this weekend. I'm always happy to take orders, so if you're interested in having some of your own fine jewelry made, I'm your gal (though most likely you're going to choose a picture of one of my pirate beauties. About Me Sometimes, I feel like my country needs a cold, hot cocktail. Usually whiskey and ginger ale for me. I'm a free-spirited gal who relishes life. My name is Earlene. I'm a proud citizen of the United States and a folk artist living in the land of the "free." I'm a sailor and a woman. I write books, blogs, doodle, and design jewelry. I love to spend time with my family and friends. I knit, crochet, sew, quilt, bake, paint, draw, alter furniture, and make pots and utensils. I'm often known for "things I say" and "what I do" when I speak. It's my hope that in time, these things will be less frequent.Q: Why do I have to compile java code when I use the OSGi console? I have Eclipse installed and running. When I open the console, I can use all the methods and commands that I would expect. For example, I can call classes, instantiate packages, and call methods. I can also, of course, run my java code.
